Perfectly Flat Floors. Delivered.<sup>™</sup>

**LATICRETE<sup>®</sup> SUPERCAP<sup>®</sup> adds AllPrep Flooring Specialists Pty Ltd as Newest Partner**

**23<sup>rd</sup> October 2020** – LATICRETE<sup>®</sup> SUPERCAP<sup>®</sup> manufacturer of the revolutionary self-leveling SUPERCAP “Pump Truck” System, announced today its new partnership with AllPrep Flooring Specialists Pty Ltd.

AllPrep Flooring Specialists Pty Ltd is the first to go to the Australian market using the LATICRETE SUPERCAP “Pump Truck” System.

A superior performing, time-saving and cost-efficient method of finishing new concrete or capping existing slabs. This cutting edge system combines the power of the pump with the next generation of self-leveling materials, resulting in the “The Next Generation Slab<sup>™</sup>”.

The “Pump Truck” is a computer-controlled, mobile blending unit (MBU) that ensures perfect concrete mixing every time. Once mixed, formulas are pumped directly onto prepared sub-floors through a controlled high-rate piping and hose system. Blending is done on-site at street level. The pump truck can continuously deliver up to 15 tons of material per hour to all kinds of buildings, even high-rises located in congested areas that are as tall as 70 stories, covering up to 4,645m<sup>2</sup> per day.

The LATICRETE SUPERCAP proprietary formula has tremendous flow and subsequent workability. Its low alkali formulation does not contribute to “alkali attack” on acrylic adhesives, as often is the case with conventional green concrete. Additionally, this system eliminates the need for power-troweling and grinding.

Noise, dust and ongoing bag clean-up issues are a thing of the past with the LATICRETE SUPERCAP environmentally-friendly “Pump Truck” system. Its technology allows for a completely new way of thinking about planning large-scale projects.

Perfectly Flat Floors. Delivered.<sup>™</sup>

AllPrep Flooring Specialists Pty Ltd Managing Director - David Kealy has over 30 years experience in the self levelling underlayment industry and will showcase the LATICRETE<sup>®</sup> SUPERCAP<sup>®</sup> System for the very first time in Australia.

*"We are very pleased and excited to be partnered with this world wide proven LATICRETE SUPERCAP System which will pump up self levelling materials up to 70 floors from street level to deliver a perfectly flat floor faster, safer and greener."* ~ David Kealy

The LATICRETE<sup>®</sup> SUPERCAP<sup>®</sup> System has been used in hundreds of projects consisting of millions of collective m<sup>2</sup> in major metropolitan areas in North America. This new partnership represents the first time the technology has been made available in Australia, and will change the dynamics on largest high-rise, commercial and industrial flooring markets.

"We are very proud and excited to work with AllPrep Flooring in Australia. David has great expertise and an excellent reputation in the market. We look forward to a successful cooperation." ~ Erno de Bruijn, President and COO International Division, Laticrete Int Inc.

LATICRETE SUPERCAP is a leading manufacturer of premium self-leveling materials for the building industry. The LATICRETE SUPERCAP System is a time-saving, cost-effective method for finishing new concrete or capping existing slabs that meet or exceed finished flooring tolerances. The system consists of a LEED-qualified, low alkali, premium self-leveling, cement-based technology that is installed using a patented computer-controlled mobile blending unit.
